

Kit Connick, Chief Officer Strategy and Partnerships and Nicky Ward, Programme Director for the ICS will lead this session that explores all of the above and creates a safe space for you to ask whatever you need to ask to help you understand the ICS – your role in it, and what difference it can make to you, your organisation and the patients you care for.

We will encourage you to be curious, ask questions, help you to get your head around the new language, as well as having a look forward to our ICS's future. This session aims to align to two key areas of the People Promise – 'we are compassionate and inclusive' and 'we are always learning'. We look forward to seeing you at this interactive and informal session.

Kit Connick has had a long-standing and successful career in the NHS in a range of corporate leadership roles across the NHS, where she has been accountable for a broad portfolio that covers both internal organisational operational delivery and system-wide strategic and cultural programmes.

She is committed to improving integration and collaboration within the ICS, making sure that we listen to the needs of our population and reflect this in our decision making and planning. Kit is passionate about supporting people to achieve their personal potential, and actively supports this through coaching and mentoring.
